

HEALTH AND SAFETY KIT

IMPORTANT

**Please direct
your move crew
to this box when
they arrive.**

At Suddath®, we're committed to keeping you, our crews and our communities as safe as possible during the COVID-19 outbreak. In this box, you'll find supplies to help our crews carry out that commitment while in your home.

For your protection, our move crews are following Center for Disease Control guidelines, as well as additional Suddath protocols to limit exposure by practicing proven safety measures. Our crews have committed to:

- ✔ Standing six feet apart at all times during the move
- ✔ Using personal protection equipment including gloves and masks (all crew members arrive to your home with their own masks)
- ✔ Forgoing handshakes
- ✔ Limiting the handling of your household goods
- ✔ Sanitizing shared surfaces including hand trucks, dollies and other materials used
- ✔ Washing or sanitizing hands after touching shared surfaces or at least every two hours

Keeping you and our crews safe can only be done with your support. Allocating a designated area where your moving crew can wash and dry their hands regularly will help limit the spread of germs (having a supply of soap and paper towels are ideal). If you have questions or concerns, ***please contact your move coordinator or call 904.390.7100.***
